

Puget Sound TRT
Twentieth meeting—Tuesday-Wednesday, November 13-14, 2001
Northwest Fisheries Science Center, Seattle, WA
DRAFT Agenda

Tuesday, November 13 (NWFSC Rm 438E)

- 9:00 Population viability issues (Sands et al.)**
- *Population viability criteria—refinements on analysis for planning range (σ^2 , effect of age structure)
 - *Equilibrium abundance vs. escapement numbers—revisit discussion of meaning of planning range numbers (see write-up from 10/18/01)
 - *Discussion of implications of different zones on population viability curves of abundance and productivity (“red/blue/green” graphic and write-up from 10/18/01)
 - *Estimates of juvenile/freshwater productivity—how to use HPVA results and MEA.
 - *schedule for chinook populations, Hood canal summer chum analyses
- noon LUNCH**
- 12:30 ESU-wide issues (All)**
- *geographic regions of significance (Fuerstenberg)
 - *groups for diversity considerations (Currens)
 - *analyses relating to catastrophes (T. Good and J. Fabbri, NWFSC)
- 3:00 Incorporating hatchery issues into TRT tasks (Currens)**
- *BRAP approach and HGMPs
 - *new TRT working group—tasks and members?
- 3:45 ADJOURN**

Wednesday, November 14 (Rm 370W)

9:00

Habitat issues (All)

- *approaches for assessing and prioritizing projects in estuarine and nearshore areas (Graeber)
- *estimating capacity of adults: fine scale analyses (L. Holsinger, NWFSC)
- *habitat case studies: coarse and fine scale analyses and questions we can address (B. Sanderson, NWFSC)
- *questions for RSRP visit Jan. 3-4
- *"Salmon funding in the Puget Sound Basin 1997-2001" (Dennis Canty)

11:00

Next priority tasks, funding (All)

- *TRT tasks, schedule (handout coming before TRT)
- *funding priorities for FY '02—e.g., Stillaguamish historical reconstruction

12:00

ADJOURN
